great deal of information, and abbreviations are an unfortunate necessity. On this sheet you will find the meanings of the abbreviations used for titles, countries (if a dog was from outside the US); colors and markings; OFA and CERF certifications, and genetic clearance information. Should you have further questions, please call the AKC Customer Service office at 919-233-9767. Web site: www.akc.org

Note that if a date is shown after a dog's registration number (such as (01-92)), this is the month and year the dog's first breeding was recorded in the Stud Book Register. It should not be confused with the dog's date of birth.

### Abbreviations Used for Titles

The following list shows the abbreviations used for earned titles. Some titles are appended to the beginning of a dog's name, and others are appended after the dog's name. Note that titles earned in a foreign country, or under non-AKC rules and regulations, are not shown on the pedigree.

### Abbreviations Used for OFA and CERF Certifications

NOTE: Certifications may not appear in the 3rd and 4th generations due to space limitations. Certification by the Orthopedic Foundation for Animals (OFA) for hips is shown as follows:  
"OFA [age in months when certified] [grade]"  
where the grade is either "E," "G," or "F" for "excellent," "good," or "fair" respectively. Note that the grade may be absent if the dog passed but the grade is unavailable or unpublished.  
Certification by OFA for elbows is shown as follows:  
"OFEL [age in months when certified]"  
Certification by the Canine Eye Registry Foundation ("CERF") is shown as follows:  
"CERF [age in months when certified]"  
Note that this certification is only good for one calendar year.

### Abbreviations Used for Genetic Clearance Information

Certification that a dog is genetically clear of a disease is shown as follows:  
"DNA ([disease]/[from of disease])"  
Example: DNA (PRA/RCD1) denotes the absence of rod-cone dysplasia (RCD1), the form of Progressive Retinal Atrophy (PRA) affecting Irish Setters.

### Abbreviations Used for Countries

The following list shows the abbreviations used for countries from which a foreign dog originated and which appear in parentheses after the dog's name. Note that foreign or other, non-AKC domestic registry registration numbers are shown for a dog only if those numbers are on file with the AKC.

### Abbreviations Used for Colors and Markings

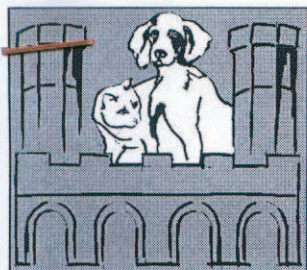

The following partial list shows the abbreviations used for colors and markings. (For a complete list visit www.akc.org/registration/colors-markings.cfm) Note that due to space limitations, abbreviations for compound colors (such as "Salt and Pepper" or "Red Merle") are not shown; instead, you will need to find the abbreviation for each color in the compound color to discover what the abbreviation means. Also, colors of foreign-registered dogs are not given on the Certified Pedigree.

Test Results: Genotype of your dog is Normal/Clear.

Risk for developing prcd-PRA: This dog will never develop the prcd form of PRA (progressive rod-cone degeneration form of Progressive Retinal Atrophy). Note that PRA in Golden Retrievers appears to consist of at least two different genetic defects. Because only a small number of PRA affected Golden Retrievers have been tested so far, it is not possible to estimate the frequency of prcd-PRA among PRA affecteds of this breed. A Golden Retriever of known status for prcd-PRA could still be at risk for another, as yet unidentified form of PRA.

Significance for breeding: Genetically Normal/Clear dogs can be bred to any dog and will produce no pups affected with the prcd form of PRA.

For further information, please consult the OptiGen website at [www.optigen.com](http://www.optigen.com).

**International DNA Based Genetic Database:** To register this result with OFA, make a copy, sign below, mail WITH FEE, to OFA, 2300 E. Nifong Blvd. Columbia, MO 65201-3856 or FAX to 573-875-5073. [www.ofa.org](http://www.ofa.org)

I hereby certify that the sample submitted was of the animal described on this application. I authorize the OFA to release all information on the test results thus placing the results in the public domain and I hereby release OFA from any and all liability associated with the release of test information.
